MONTMORENCY

Mrs. May's CHERRY PIE ORCHARD

Cherries have been scarce and high priced. Most families haven't had nearly as many as they wanted for fresh cherry pies and sauces and for home canning. You can have plenty, all you want, enjoy them at their freshest and best . . . by planting trees of your own this year. The first bushel you pick will more than pay for the tree.

By planting these two varieties you'll have long weeks with all the cherries you want. You'll be eating Early Richmond in late May. Improved Montmorency will ripen about 10 days later. We will send you improved strains, heavy rooted and well branched trees. Order early.

Our Nursery Guarantee

FIRST: We guarantee our Nursery stock to be absolutely TRUE-TO-NAME. If it proves otherwise, you can have your choice of Replacement Free or a Full Refund of the entire purchase price.

SECOND: We guarantee our Nursery Stock to be strictly high quality, exactly as described in this catalog. We further guarantee it to reach you in good, live, thrifty growing condition. If you are not completely satisfied when you examine it on arrival, return it at once at our expense and you can have your choice of Replacement Free or a Full Refund of the entire purchase price.

THIRD: Our Nursery Stock is strong, heavy-rooted and vigorous. It is dug and handled and packed with the utmost care. But, if it fails to grow for you, we will replace it at half-price the following season. We can't control weather conditions and other factors which might affect its growth, but we will share the loss with you and meet you half way. You must report your losses to us by October 1, 1948.

Below is a picture of the Certificate of Nursery Inspection showing that our Nursery Stock is fully inspected and that our raspberry plants are doubly inspected for virus diseases. This Certificate and our Nursery Guarantee, above, are your assurance of real Quality and Complete Satisfaction.

Dear Friends:

For many years in this space it was my father's habit to, first of all, say, "Thank You" for the orders you had sent to him. I certainly want to do that, too, and it can be a big "thank you" because we have had the best year in the company's history.

I am especially grateful and proud since it is the first year we have been without the advice and counsel of my father, founder of this business. His principles, the things he stood for, are the guide posts we all follow. He was a stickler for Quality. He believed in giving Honest Value. And I have heard him say many times that it is a fine thing to sweeten Quality and Honest Value with Friendly Service. All of us seed house folks are hewing close to those lines as we carry on.

As the new season for planting and seeding opens up, we have ample stocks of most everything. But, the long drouth of late Summer cut production of some things and we don't know when we will have to start saying "sold out." So, we urge our friends to order early. It is the one sure way of getting exactly what you want.

And there is an even better reason for you to send your order right away. The earlier you plant your trees and bushes and nursery plants, the sooner they get started. They gain extra weeks of growth and development. They reward you with earlier fruiting and larger, more abundant bloom. We reward you, too, for early Nursery Orders as you can see by the fine premiums across the page.

A Promise Repeated

You can be sure we will do everything possible to deserve the orders you send us. Our guarantee of your complete satisfaction stands just as it has stood for over a quarter of a century. We want your business, and your good will and hope you will recommend us to your friends and neighbors.

And remember you help us to give better service and you help yourself to earlier growth and development of the nursery stock you plant . . . when you order early.

Sincerely,

EDWARD MAY

See the fine premiums for early nursery orders across the page and don't miss the extra premiums for your garden seed orders listed on Page 25.

EASY TO ORDER

Just list what you want on the enclosed order sheet or on any sheet of paper. Please write your name and address plainly, giving rural route or street address. Also, if your express station is different than your postoffice, list the express station, too.

Easy to Send Money

Your personal check is good with us, or you can send a Money Order or Bank Draft. If you send currency or coin, wrap it carefully and you should then register your letter. Every year thousands of our customers send us signed checks with the amount left blank to be filled in with the correct amount to cover the order. This works out fine for everyone because the checks are always filled out for the exact amount of the order and at the lowest prices in effect the day the order is received.

MOST THINGS POSTPAID

You will see that most everything in this catalog is delivered to you Postpaid. This represents a big saving to you. Some things too large to go by parcel post are quoted "Not Prepaid". We ship these by Express. But, since nursery stock goes at the low second class express rate, the charges you pay on such shipments are generally as cheap as freight, sometimes even less.

If your order includes some of the larger items which must go by Express and some which would be postpaid by us, then we will send the entire order by Express. This will avoid making two separate shipments.

For this privilege we will include some extra nursery stock which has a greater value than the additional express charge amount to.

DWARF APPLE TREES

Here is the answer to all you folks who have wanted apple trees in your yard but just didn't have room for the larger growing trees. Standard varieties are budded onto a special root stock. The tree is an ornamental beauty when in bloom and the fruit is easy to pick. Dwarf apple trees bear 2 to 3 years sooner than standard trees. You can surely find room in your yard for some Dwarf Apple Trees. These varieties described elsewhere on this page and pictured on the opposite page:

Apple Pie . . . Apple Sauce Baked Apples . . . Strudel

We all love apples and the many delicious dishes made with apples. But, lots of folks are not enjoying them very often . . . because apples have been very expensive and scarce. Even a small grocery sack of apples takes a big bite out of a dollar bill. The answer is—

Plant Earl May apple trees this year and grow your own. It's the way to an abundance of this luscious fruit . . . at a very small fraction of what you'd pay "the other fellow".

Years of selective propagation put Earl May's Apple Trees definitely in the superior class. *Bud selection has been made from parent stock which is truest-to-type, fruits earliest, and bears the most and finest apples. These trees are repeatedly cultivated and trimmed as they grow to develop heavy root systems and good branch structure. They are superior . . . in size and all-around quality.* They are big and sturdy and husky. Thousands of our customers will tell you "the best I ever saw". Order early so you plant them early for faster growth and earlier fruit.

"APPLE ORCHARD" Quintuplet Tree

One of
The Miracle
Achievements
of Modern
Horticulture

**GROWS
5 DIFFERENT
KINDS
OF APPLES
ON
ONLY
ONE
TREE**

QUINTUPLET APPLE TREE

Here is one of the miracle achievements of Horticulture! A single tree from which you can pick 5 separate and distinct varieties of Apples. You can enjoy the many fruits of a whole apple orchard even though you have room for only one or two trees. How is the Quintuplet "Apple Orchard tree" produced? Five expert budders are assigned to one row of trees. Each man carries buds of only one variety and inserts one bud in each tree. When these five budders have finished the row, each tree has those five varieties budded into it. Since each bud makes its own separate limb growth, they will produce the exact variety of fruit which was budded on. Plant one or two of our Quintuplet Orchard trees and you will really have as many or even more kinds of apples than are produced in most home orchards.

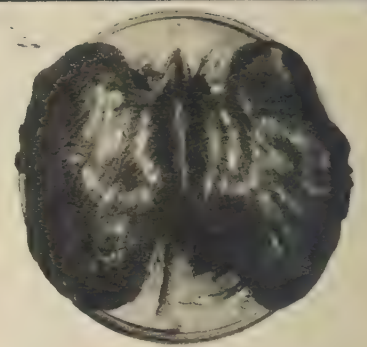

6126. When you plant our Standard Quintuplet Apple Orchard tree, you pick (1) **Wealthy**, an early Fall all-purpose apple; (2) **Yellow Delicious**, late Fall eating and baking apple; (3) **All Red Delicious**, finest of all eating apples; (4) **All Red Jonathan**, greatest all-purpose apple, and (5) **Crimson Winesap**, fine for eating and cooking and one of the best winter apples.

The New Larger THOMAS BLACK WALNUT

A wonderfully improved new strain which bears much earlier and has larger nuts with a softer shell almost as easily cracked as the English Walnuts.

The year before it had about $\frac{2}{3}$ of a bushel and the year before that about $\frac{1}{2}$ bushel. How's that for early bearing? **And friends, look at the size of the kernel, larger than a half dollar. Best of all, the shells are soft, easily cracked.** It will grow in any state in the Union and we urge you to get them started on your place this year. The supply is limited. OUR NATION'S LEADERS ASK FOR FOOD! FOOD! and MORE FOOD!

Most of us feel a little helpless and sometimes confused when world problems are discussed. We all want a permanent peace but hardly know what we, as individuals, can do to help. But, there is one thing nearly all of us can and should do. We can answer the Nation's need for 20 million Freedom Gardens.

"FOOD" is the biggest word in the world today. And our leaders tell us Food will be a most important consideration for peace for the next 3 to 5 years.

Secretary of Agriculture Clinton P. Anderson has said, "The individual contributions of home gardeners can be tremendously significant in adding to our domestic food supply." He also states, "By helping to meet increasing living costs, the home gardener will make a precious contribution to a hungry world."

It is a contribution to World Peace which works both ways. You have the fresher, tastier food from your garden and orchard. You make a really big saving in your living costs. And at the same time you help our country in the immense task of halting starvation throughout the world.

Plan now for the vegetables and fruits you will want to plant when Spring comes. Even a "back yard" garden will produce bushels of food. Even a small berry patch and a few fruit trees will bring you a lot of fine eating. Plan now! Plant Food this Spring!

**A Treasure
In Goodness!**

Berry Preserves! A treasure in every household. But they've been scarce and expensive. Enjoy all you want, at hardly any cost . . . by planting your own patch this spring.

Can't be beat for pies, jelly, jam, preserves and is a rare treat eaten fresh with cream. Hardy, too, and easy to transplant. Our strong, vigorous plants will please you 100%. TRIPLE TESTED SEEDS

IN OUR LABORATORY

Every packet, every pound of our vegetable seeds is Laboratory Tested to assure you High Germination. We know they are ready and "anxious" to grow before they are ever put in the packet and bags to be sent out to you. Literally, thousands of these tests are made each year in our laboratory. That's one reason why our customers report such good stands and such high yields from their gardens.

IN OUR 76-ACRE TEST GARDENS

Every year we plant scores of varieties of vegetables in our 76-acre test gardens . . . old favorite varieties and new ones, too. In these tests we search out the thriftier, heavier yielding varieties. Time and again we discover a superior plant growing in an already established strain. From this superior plant our improved strains are developed. The name of the variety is the same but our tests show one strain to be very much better than the others. It is the better, the improved strains, we packet for our customers. (See lower left for planting details.)

ON OUR TABLES

Yes, that's the final and very important test . . . because you want the finer textured, finer flavored vegetables from your garden. We bring in truck loads of vegetables from our test gardens and just pass them out to folks here at the seedhouse to try in their own kitchens. From all their reports we know exactly which varieties give the greatest taste satisfaction. Plant our seeds and enjoy the finer textured, finer flavored, really nicer varieties.

158. (Hybrid K4 or Purdue 32.) No accident about this wonder hybrid! No guesswork about the sensational records this hybrid popcorn is making! At Purdue University, where it was originated, exact tests have been made over a period of years. In a 4-year test, Purdue 32 yielded 55% more than Open Pollinated. In a 3-year test, it popped 35% greater volume. Giant popped kernels, the nearest hull-less of any corn you've ever eaten, and the flavor and texture are "excellent". Average a little better than 2 big ears per stalk. Out of 24 varieties in our tests, this was the best. Big Stalks, almost like field corn. We have a limited production of this South American Jumbo Hybrid (Purdue 32) this year. You need to know what a wonder hybrid it really is. Don't delay. Send your order today.

ONION PLANTS

Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant them about 1½ inches apart. The first time you thin them out for "green" onions. The next thinning for stewed onions. Then, let the rest go on to make you plenty for fall and winter use. Order at least 2 varieties: **WHITE BERMUDA** for the mildest you've ever eaten and **YELLOW SWEET SPANISH** for a good mild onion that keeps for months. Shipment made at proper planting time. Order early for early planting.

RAISE YOUR OWN GROCERIES

It pays. The first picking of peas more than pays the cost of your whole planting. The first mess of green beans makes all the others "net profit." A dozen ears of sweet corn more than pays for all the seed you plant. And think of how much fresher, more delicious it is when home grown!

TOMATOES

RUTGER'S MAIN CROP (77 DAYS)

Best for Canning

745. We introduced this great tomato 10 years ago and it has been growing in popularity ever since. It is the best, large, red, main crop tomato of them all. It is the most dependable big crop tomato, too. *The fruits are large and the quality is unsurpassed. The plants are strong and have just enough foliage to protect the fruits from sun scald.* The large, bright scarlet tomatoes ripen from the inside out, evenly all the way through. The deep red, solid flesh is exceptionally fine for slicing and canning. No hard cores. *They hold their large uniform size and keep bearing clear up until frost hits them in late fall.* We had Rutger's Tomatoes this year from our own vines up until the tenth of October. You'll get a larger yield from Rutger's than any other variety we know of. An all around, all purpose, home garden tomato.

Big Pkt. (over 800 seeds) 10c; 1/2 oz. 30c; ounce 55c; 1/4 lb. \$1.65, Postpaid

WISCONSIN 55

Extra meaty. Extra mild.

760. (75 days.) The extreme meatiness and grand mild flavor of this tomato will give you a real thrill. It's a big, smooth, deep red tomato with extra thick side walls and inner walls. That ought to be enough but it isn't all by a long ways. *Wisconsin 55 is a very vigorous grower, makes a tremendous vine growth, and goes on producing wonderful big meaty tomatoes right up until frost.* It successfully resists unfavorable conditions that seriously affect many less vigorous varieties. We will promise you that you'll be glad you tried this fine new tomato, developed by the Wisconsin Experimental Station. Order it today.

Smoothest Large Early Tomato

762. (65 days.) You can count dozens of big smooth tomatoes on the Sioux vine above. The foliage was removed to show you what a wonderful set of fine fruit you can expect from this new variety. *In our test gardens, every blossom cluster on Sioux vines set from 2 to 7 tomatoes (as many as 97 tomatoes on a single vine!). That means not only a great bumper crop but also a continuous supply of tomatoes.* The fruit is large, extra smooth, and much more meaty-solid than the old varieties. Sioux ripens uniformly to a beautiful bright red (no green shoulders or spots) and the flavor is truly delicious. Be sure you have Sioux in your garden this year. You'll agree it is a great variety.

Big Pkt. 15c; 1/4 ounce 30c; ounce \$1.00, Postpaid. (See plant prices at the left.)

Sioux and Red Cloud were developed by the University of Nebraska Agricultural College, as a result of breeding and selection by Dr. H. O. Werner. They were developed to provide varieties that set fruit even under the unfavorable conditions of mid-summer heat and hot winds.

Red Cloud ripens unbelievably early! Plants set out early in May yield some ripe tomatoes in Mid-July and will be in full production by August 1st. *Three to four weeks earlier than Rutger!* You can be eating Red Cloud out of your garden when tomatoes are selling for 7c to 10c apiece. ALL-AMERICA ROSE SELECTIONS

Only the finest hybrid tea roses ever achieve All America acclaim. They are selected for perfection of bud and bloom, for vigorous growth and abundant bloom, for fragrance, and every worthwhile characteristic. These annual awards are now made following observation and reports from eighteen official test gardens around the country. The five presented here are sure to thrill you with exquisite beauty and fragrance.

5013. DIAMOND JUBILEE. (Pat. Applied For.) 1948 All America Winner. Very large, high-centered flowers are glowing buff-orange with the base of the petals brightened with orange-yellow tones. Buds open slowly, last exceptionally long with intensification rather than fading of the exquisite colorings. Sturdy upstanding growth produces long clean stems ideal for cutting. This prolific bloomer will bring new and thrilling beauty to every rose planting. **Each \$2.00, Postpaid.**

5012. NOCTURNE. (Pl. Pat. 713.) The brilliant glowing beauty of Nocturne will thrill every lover of roses. Long streamlined buds of red open to a very large rose of cardinal red with richly highlighted darker shadings of chrysanthemum-crimson. A strong grower, prolific with bloom, and possessed of luxuriant glossy foliage. **Each \$2.00, Postpaid.**

5021. PEACE. (Pl. Pat. 591) The soft blendings of light gold and cerise make description of this great rose very difficult. Long buds of white and gold are edged cerise. Blooms open to immense size, 5 inches across. The center of the flower glows softly golden, while the cerise edging suffuses and blends beautifully deeper into the petals. Very long lasting and very prolific. **Each \$2.00, Postpaid.**

5007. TAFFETA. (Pl. Pat 716) The predominant color of this 1948 All-America Winner is rich rose carmine and there is a charming change to begonia-rose as the flower opens. The reverse of the petals is softly tinted old gold. Delightful fragrance and very long stems contribute still more excellence to this award winner. **Each \$2.00, Postpaid.**

5022. RUBAIYAT. (Pat. Applied For) The only All American winner for 1947 is this vivid rich-red rose. The buds are long and shapely, slowly opening to extra large blooms . . . of heady old rose fragrance. The stems are long and upright. The bush grows vigorously and very tall, producing an abundant profusion of bloom. **Each \$2.00, Postpaid.**

A New Race of Hardiness Previously Unknown in Hybrid Teas

BROWNELL

EVERBLOOMING SUB-ZERO

HYBRID TEA ROSES

A new family of roses produced especially to live and thrive year after year in sub-zero climates. *Brownell Sub-Zero Roses come through winters of 15° below zero without any protection at all.* But, if protection of a good mulch is provided, the bushes will be larger in the spring and produce more and larger blooms. With such protection Brownell Sub-Zero Roses will winter in areas where temperatures of 15° to 40° below zero are expected.

For size, form and colors the Brownell Sub-Zero Roses compare with the best. The blooms are large and, due to extra thriftiness and hardiness, the bushes bloom more abundantly and more consistently throughout the season.

For dependable year-after-year beauty and loveliness and fragrance, plant Brownell Sub-Zero Roses this spring. Order early so you can plant them early.
